

Template driven

① easy to use

② based on template.
ngModel.

③ simple forms

complex logic

customized validation

④ ngModel → binding

more of HTML / less
code

⑤ automatic tracking
of form content.

ngModel

⑥ testing

↑
more work is

done by FormModel

Reactive
more flexible &
needs more practice

centralized stuff
to control the
over all activities
in our app'n

component centric

No binding

more code

manual mapping

coding

testing is possible

because its component
centric.
